

Michael Lennon

Michael Lennon is a CEPL Senior Fellow who teaches innovation management in the public interest. His classroom courses are participatory action projects with observable impacts in organizations or society. His inter-disciplinary approach equips practitioners to leverage diverse frameworks, practices and tools ranging from the sciences of human thriving and of human learning, to evidence-based performance management, as well as, analytic and technological innovation.

Beyond CEPL, Michael Lennon is an Innovation Management and Action Learning Advisor with 20+ years' experience assisting organizations and communities to innovate and transform their staff, business practices and systems. Mr. Lennon is a Fellow for the Royal Society for the Arts, Manufacture and Commerce dedicated to fostering Powerful thinking and Practical Action to Enrich Society. Mr. Lennon's latest peer collaboration in the public interest (via the IEEE.org) aims to define a set of engineering standards for the ethical design of artificial intelligence systems impacting human well-being.
